

vZOB Events Participation Policy

To ensure a high quality of service is met during vZOB events, it is the policy of vZOB ARTCC that all controllers participating in a scheduled event, must be fully certified for the position they intend to control.

This policy may be waived at the discretion of vZOB management if the following conditions are met:

1. The student must have a minimum of 20 hrs controlling the position on the VATSIM network.
2. The student must be evaluated and endorsed to control the position by a vZOB instructor prior to the event.
