

Departing from Pittsburgh Airspace:

Pittsburgh International has one departure procedure, the Pittsburgh Nine Departure.

The DP has several initial waypoints that should be filed for; appropriate for the direction of a flight.

--BSV (Briggs VOR) - West/NW

--TVT (Tiverton VOR) - West/SW

--HLG (Wheeling VOR) - West/SW

--DILNE - West/SW

--EWC (Elwood City VOR) - North

--BURGS - South/SW

--MGW (Morgantown VOR) - Southeast

--JST (Johnstown VOR) - East

--REC (Revloc VOR) - East

--TON (Tyrone VOR) - East/NE

The decision of which fix is best to use for your direction of flight is up to you, but all flight plans filed should have one of the above fixes as the initial fix.

KAGC has the Allegheny Five departure, which uses most of the same fixes as KPIT. Check the chart for all the official departure waypoints.
